

The Dentist

Tartar Removal

What is tartar?

Tartar is a hard, sandy coloured substance on my teeth.

It is important to remove tartar to stop:

- Bad smells,

● Gum disease

The dentist removes the tartar

The dentist uses a small tool to scrape the tartar from my teeth.

● The tool vibrates, makes a noise and sprays water

The dental nurse puts a small suction tube in my mouth.

The dentist polishes my teeth with another small tool.

Afterwards, my teeth are clean and shiny.

This factsheet was produced in partnership with
The French Union for Oral and Dental Care (UFSBD) and the SOSS network
which promotes access to oral and dental care for people with disabilities.

It was created with financial support from our partners:

**FONDATION HANDICAP
MALAKOFF MÉDÉRIC**
Groupe malakoff médéric humanis

**The translation of this tool was made possible
thanks to the support of the Orange Foundation.**
