

# An X-Ray

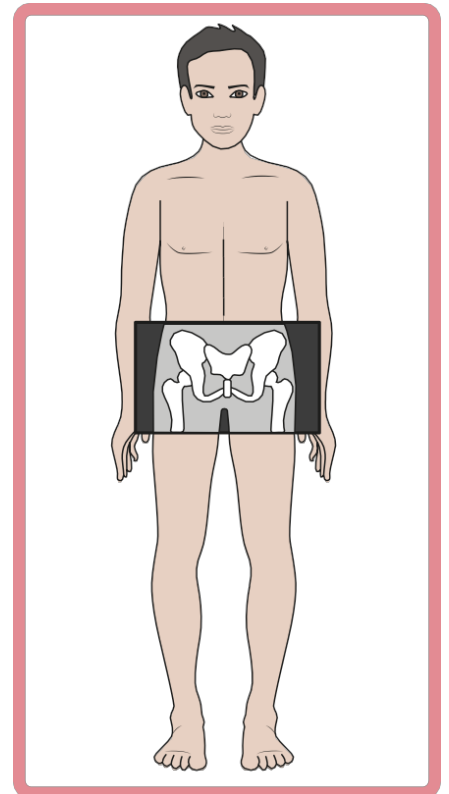

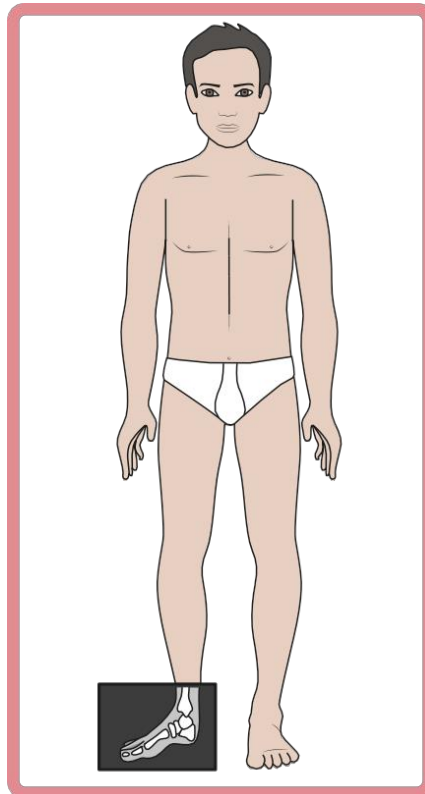

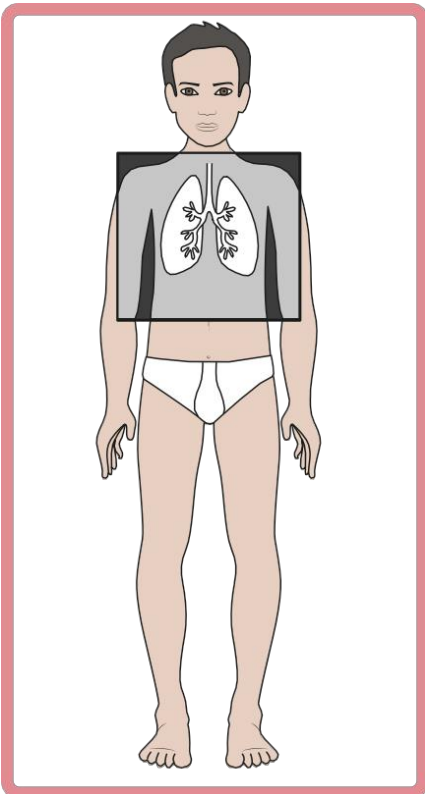

# What is an X-Ray?

**An X-Ray is an image of part of my body.**

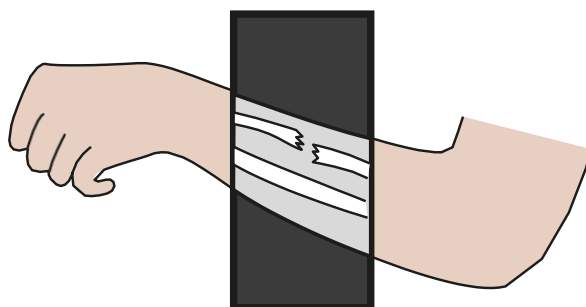

**An X-Ray lets the radiologist see inside my body.**

The radiologist is the doctor who analyses the images from the X-Ray.

- For example, they can see if I have a broken bone.

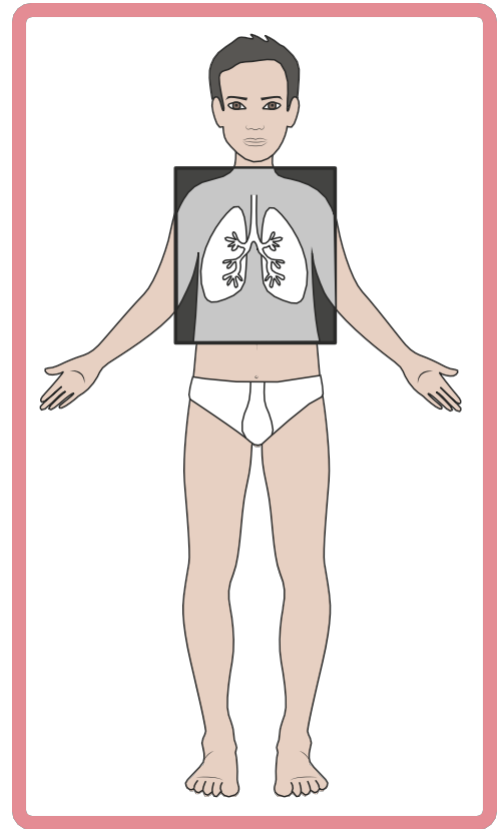

- They can see if one of my joints is deformed or has a problem.

**The radiologist can see some of my organs.**

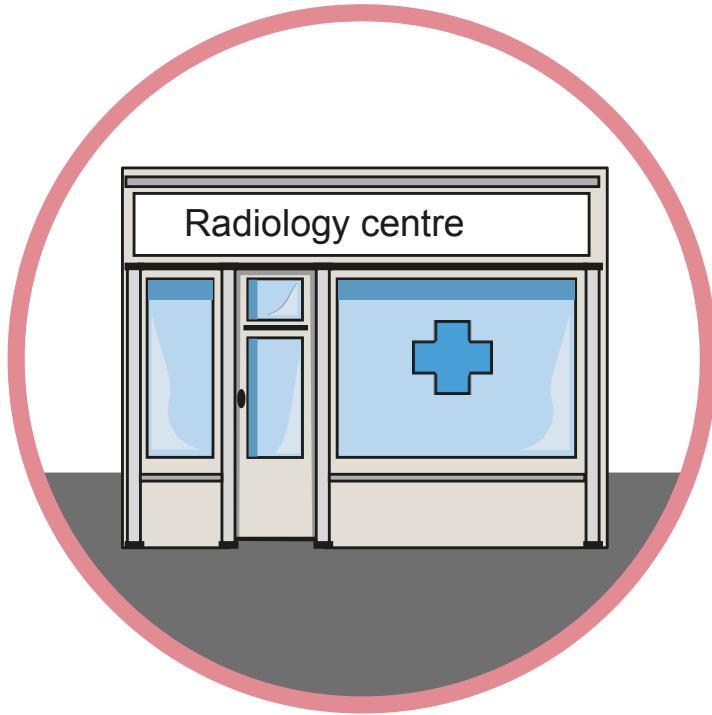

- **For example, if I have a cough, they can look at my lungs.**

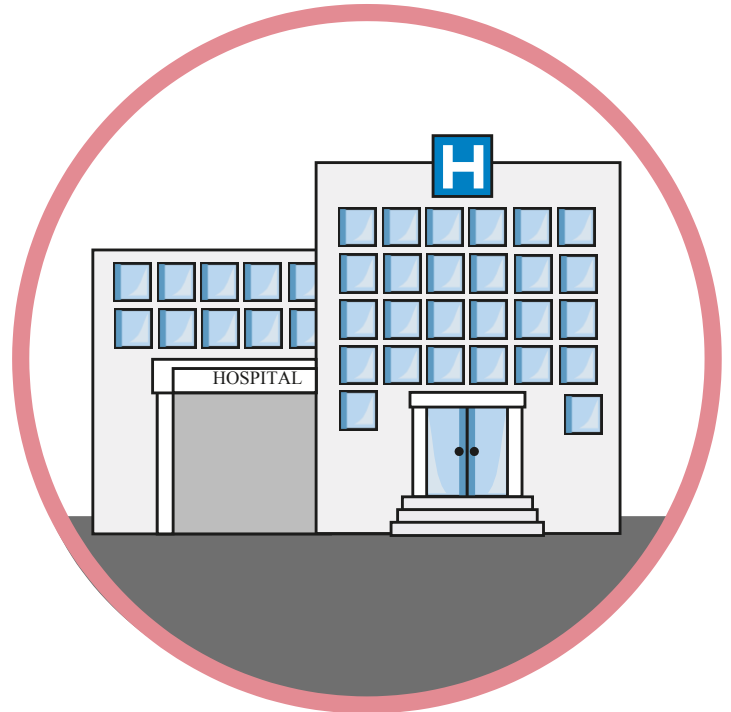

# What happens?

I can have an X-Ray:

- at a radiology centre

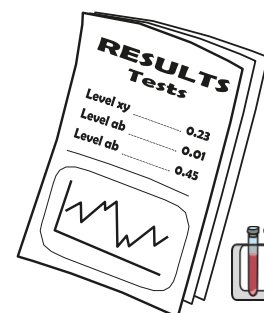

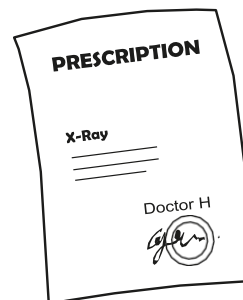

- at the hospital or clinic.

At reception, I give my name and address and health insurance card if I have one.

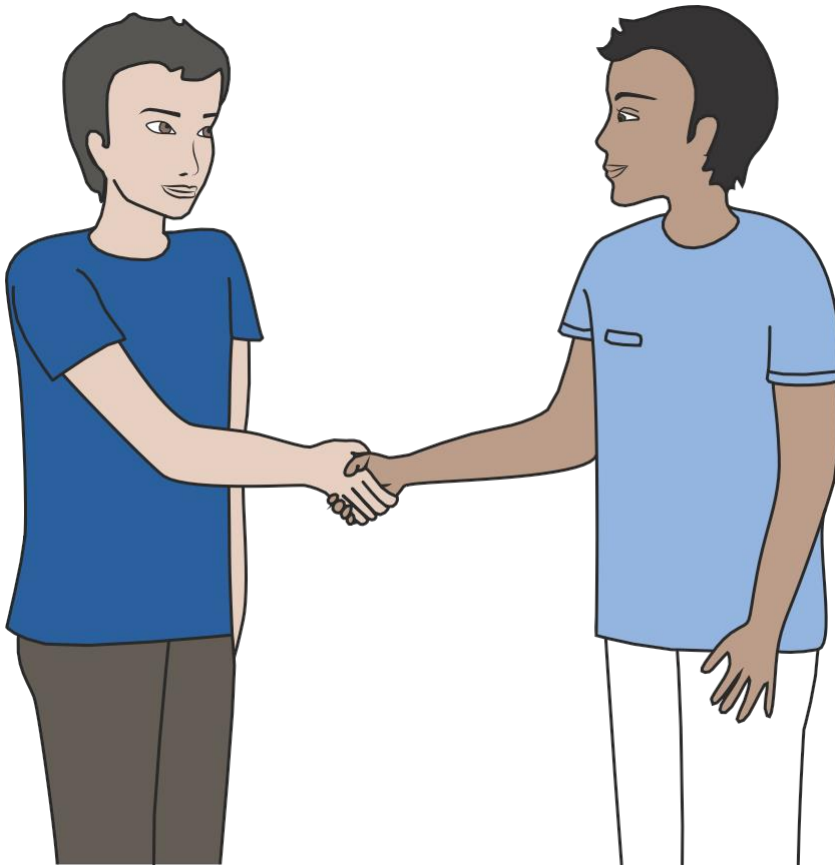

- If the receptionist has asked for them:  
I also bring my old X-Rays and test results.

The radiographer meets me.

The radiographer is the person who operates the

- X-Ray machine. They ask me if I am pregnant.

I go into the X-Ray room.

**The Booth**

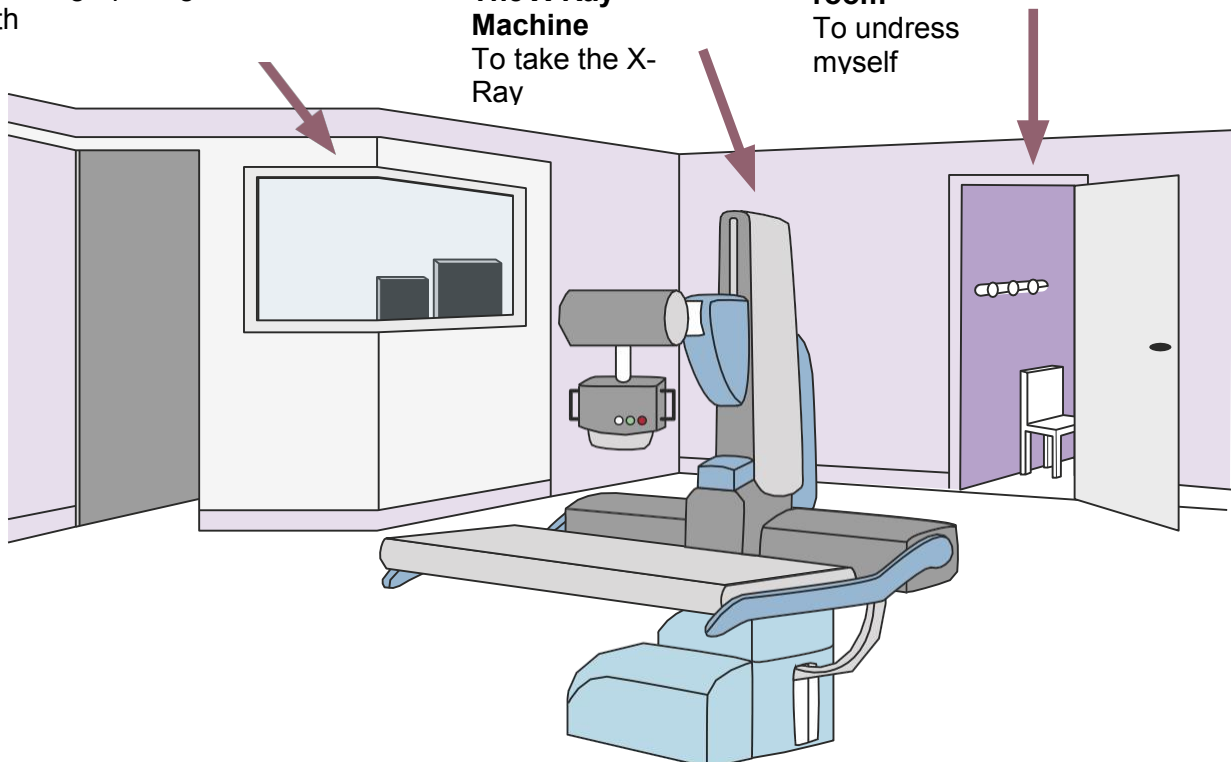

The radiographer goes into the booth

**The X-Ray Machine**

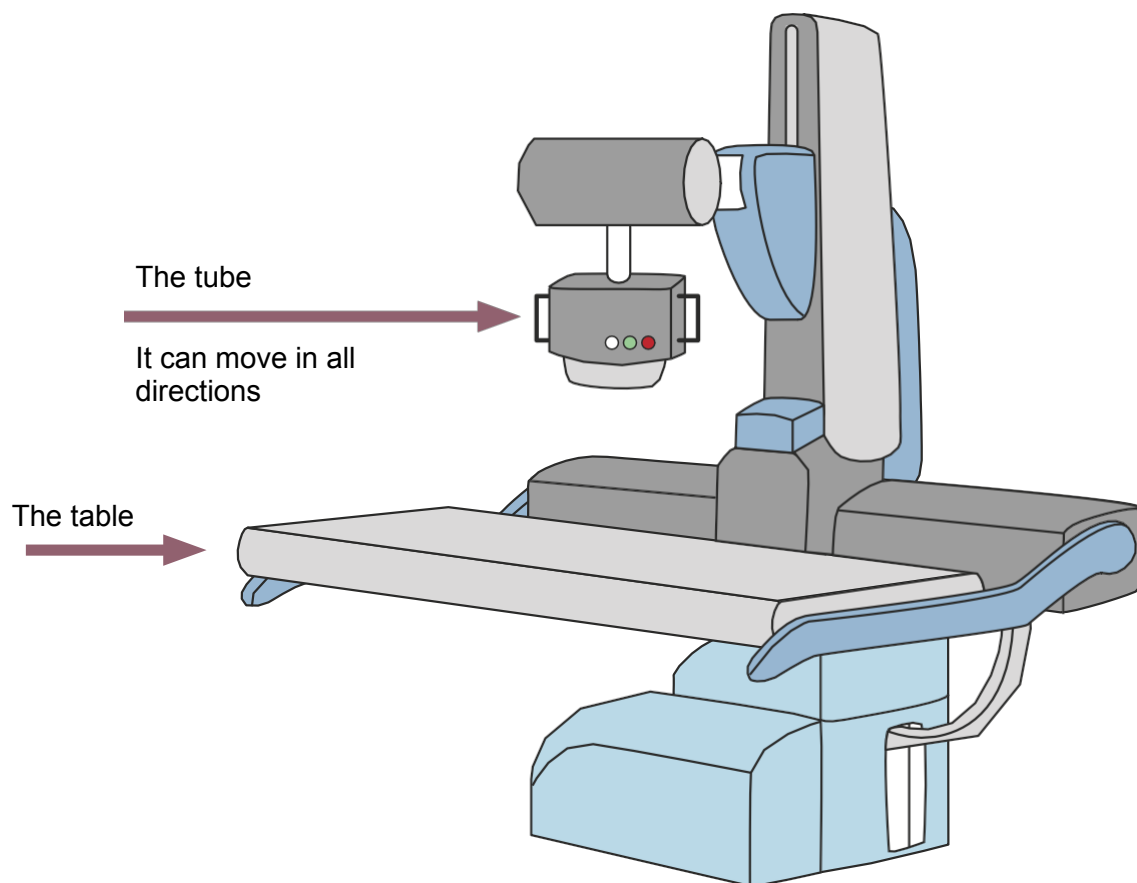

To take the X-Ray

**Changing room**

To undress myself

**There is a big machine.**

**The radiographer takes me to the changing room.**

- The radiographer may ask me take off some of my clothes.

- They ask me to take off my jewellery.

I must not forget to take off my earrings or piercings.

- For some X-Rays, the radiographer may ask me to take off:

my glasses or my hearing aid,

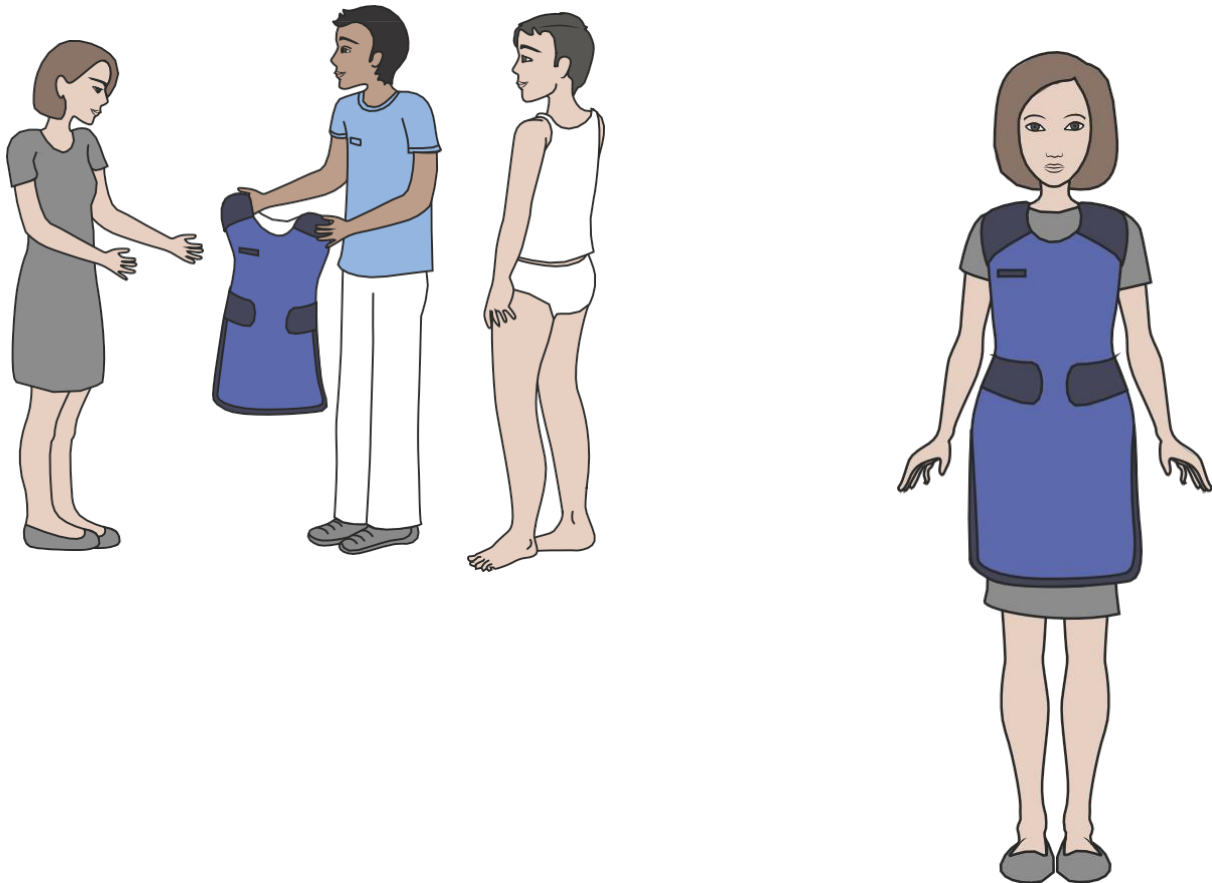

anything in my pockets.

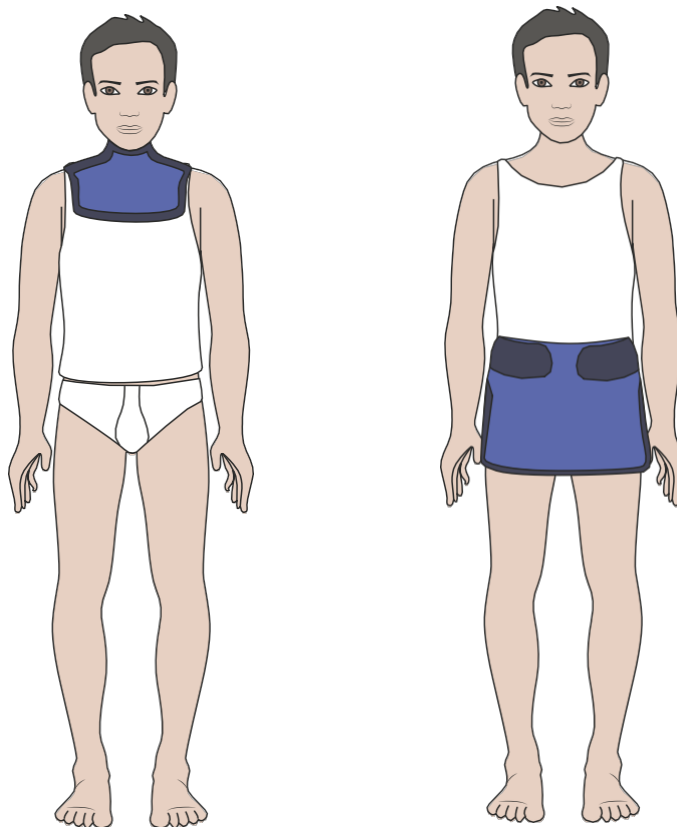

**The person accompanying me can stay with me.**

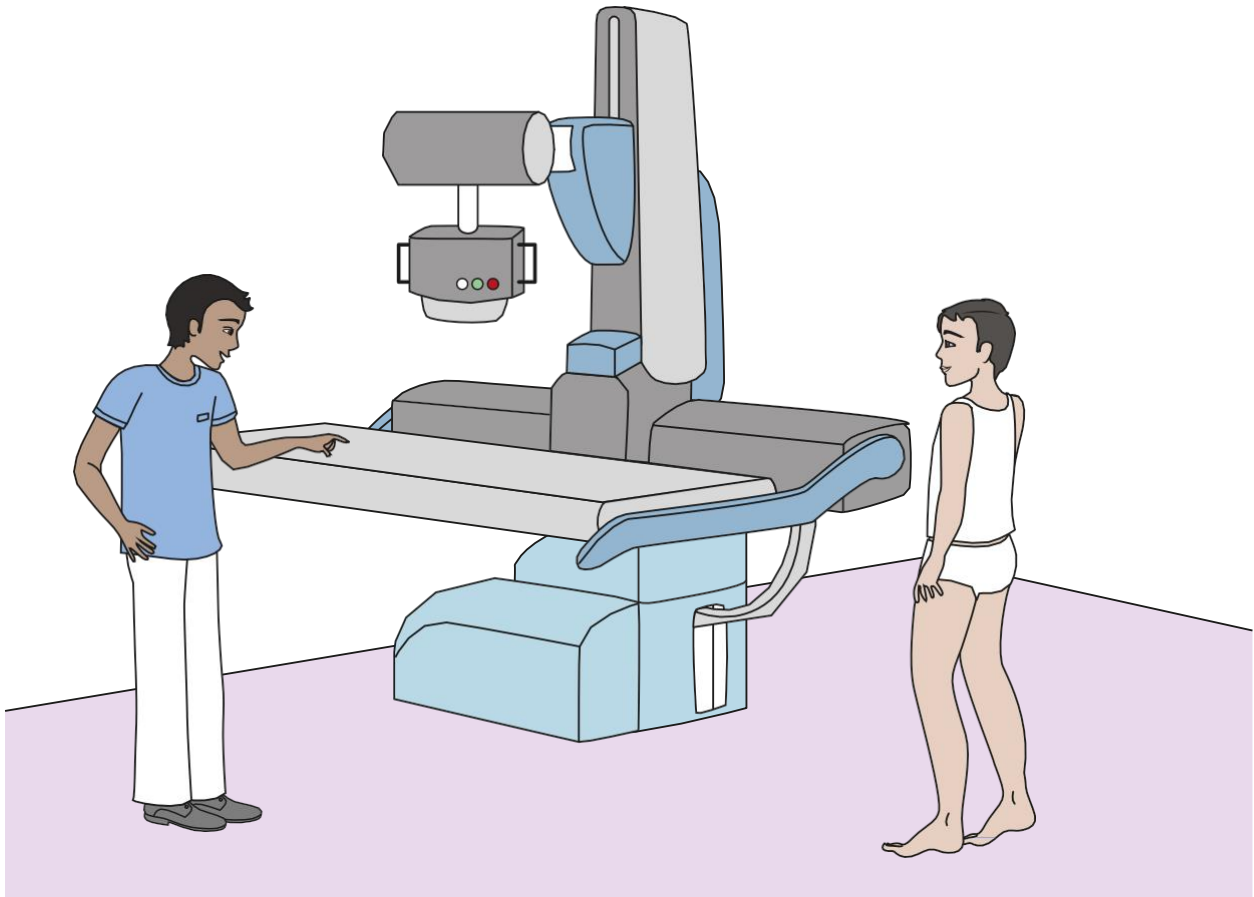

- **The radiographer gives them clothes like a protective apron.**

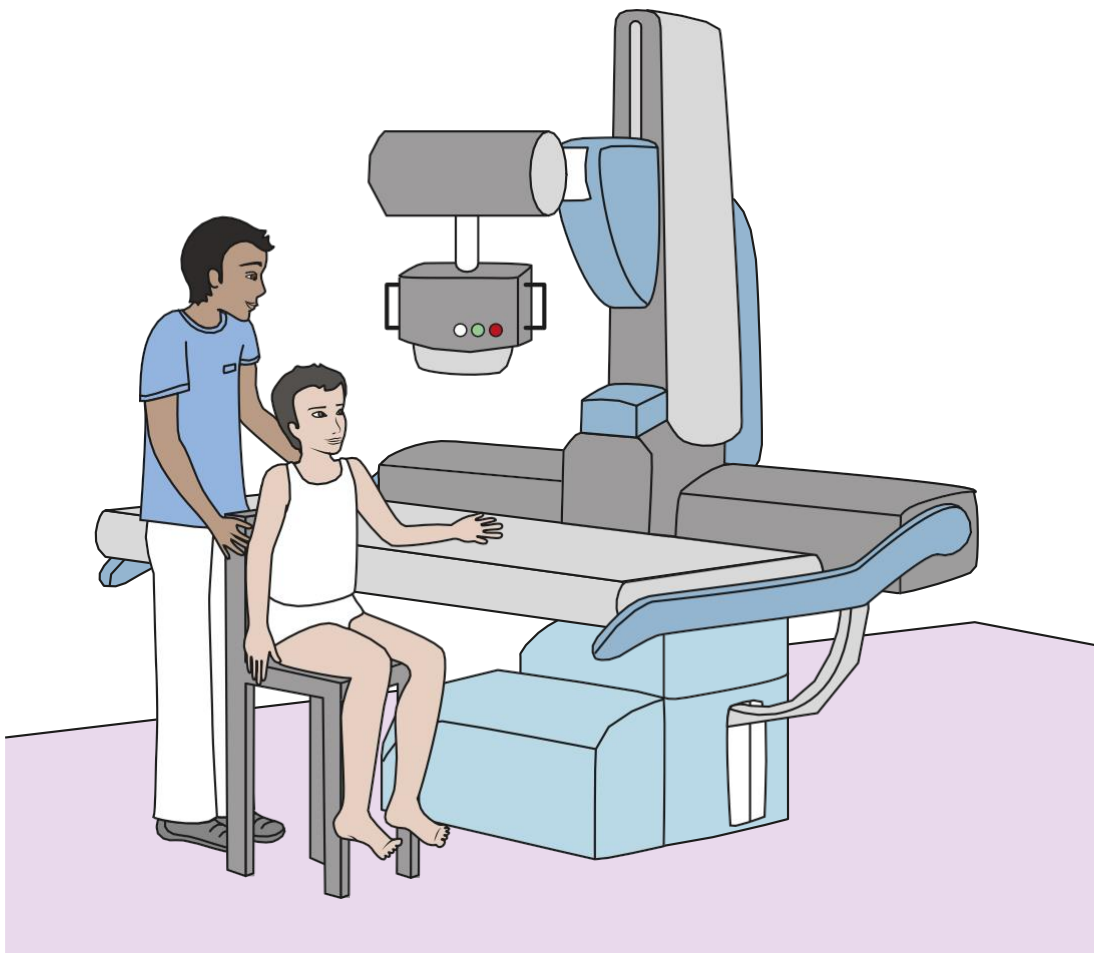

- **For some X-Rays, the radiographer may also give me protective clothes.**

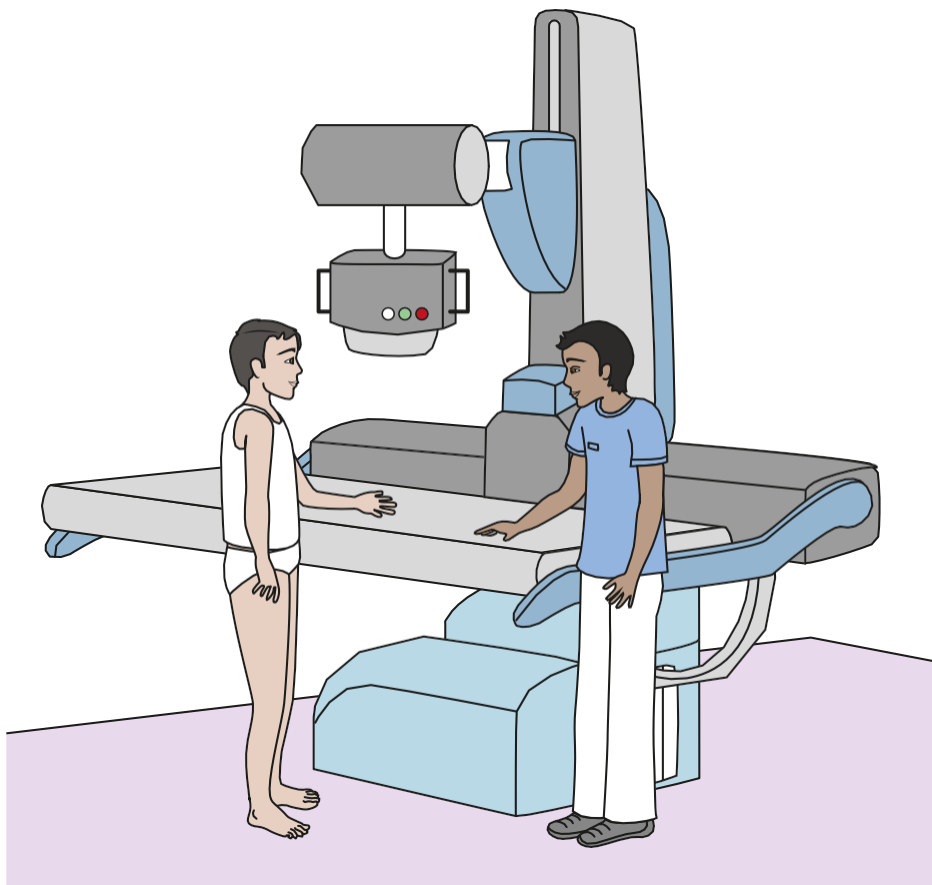

**The technician explains what is going to happen.**

**I can sit in a chair.**

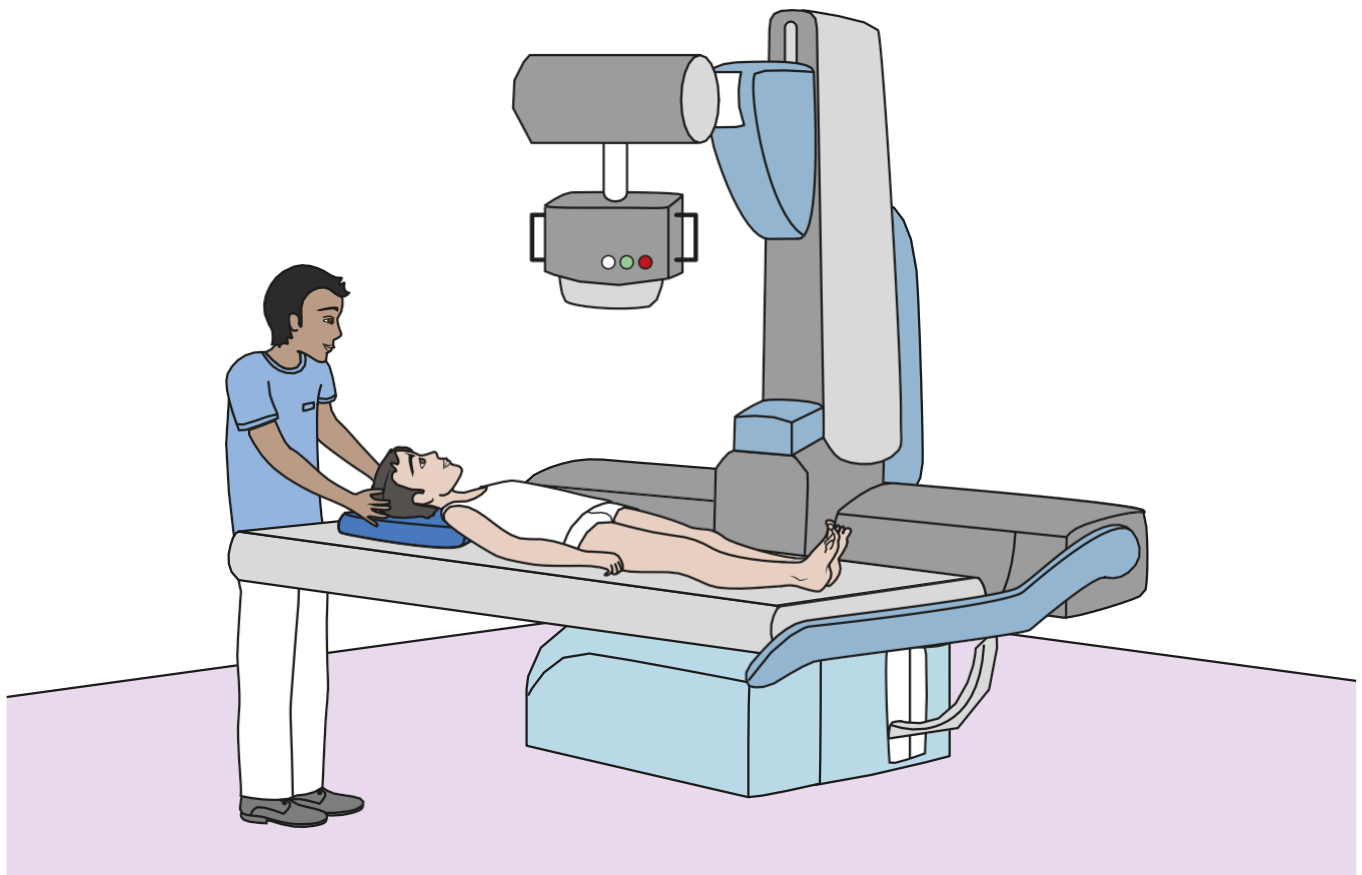

**I can stand up.**

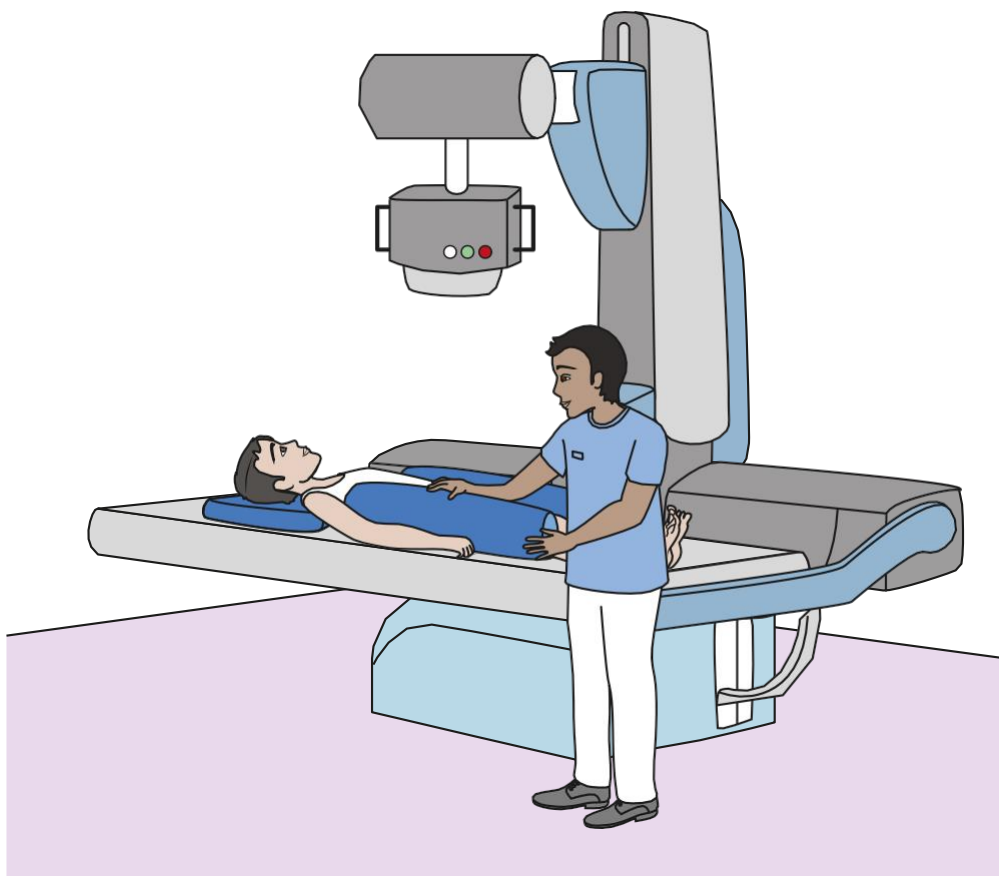

**I can lie down: the radiographer will help me.**

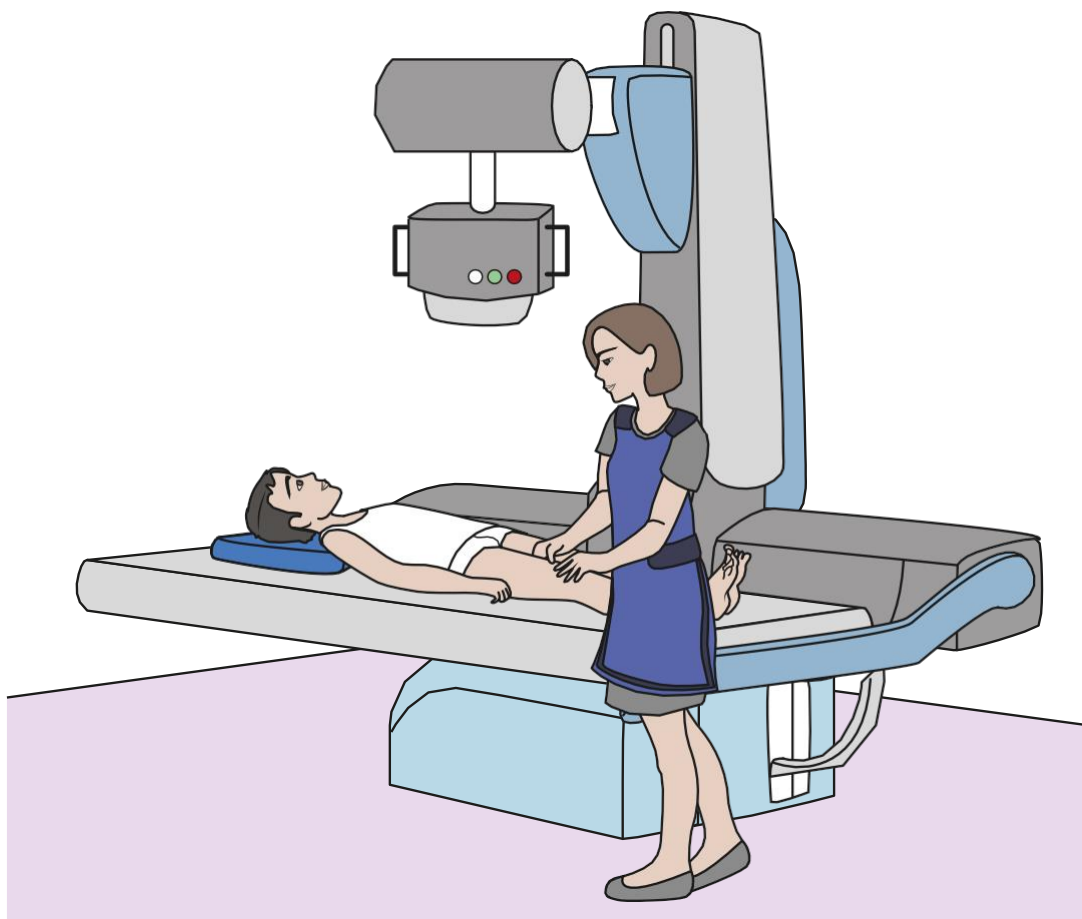

- **They may keep my head still with a cushion.**

- The radiographer may keep other parts of my body still.

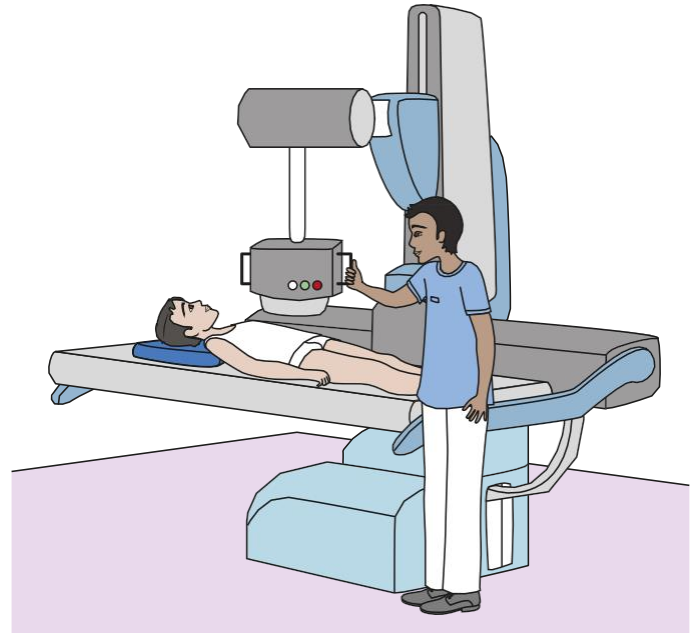

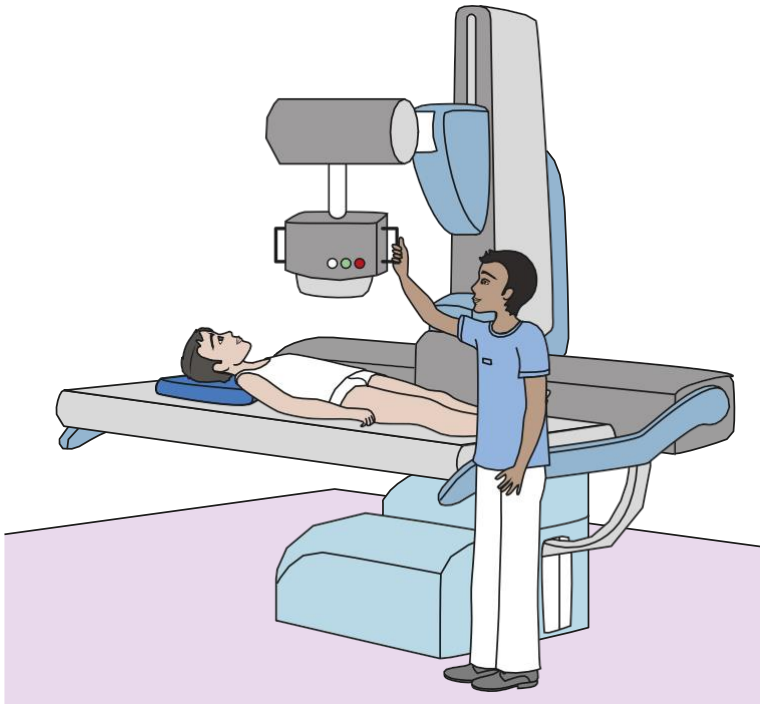

- If I am moving, the radiographer may ask the person accompanying me to help me.

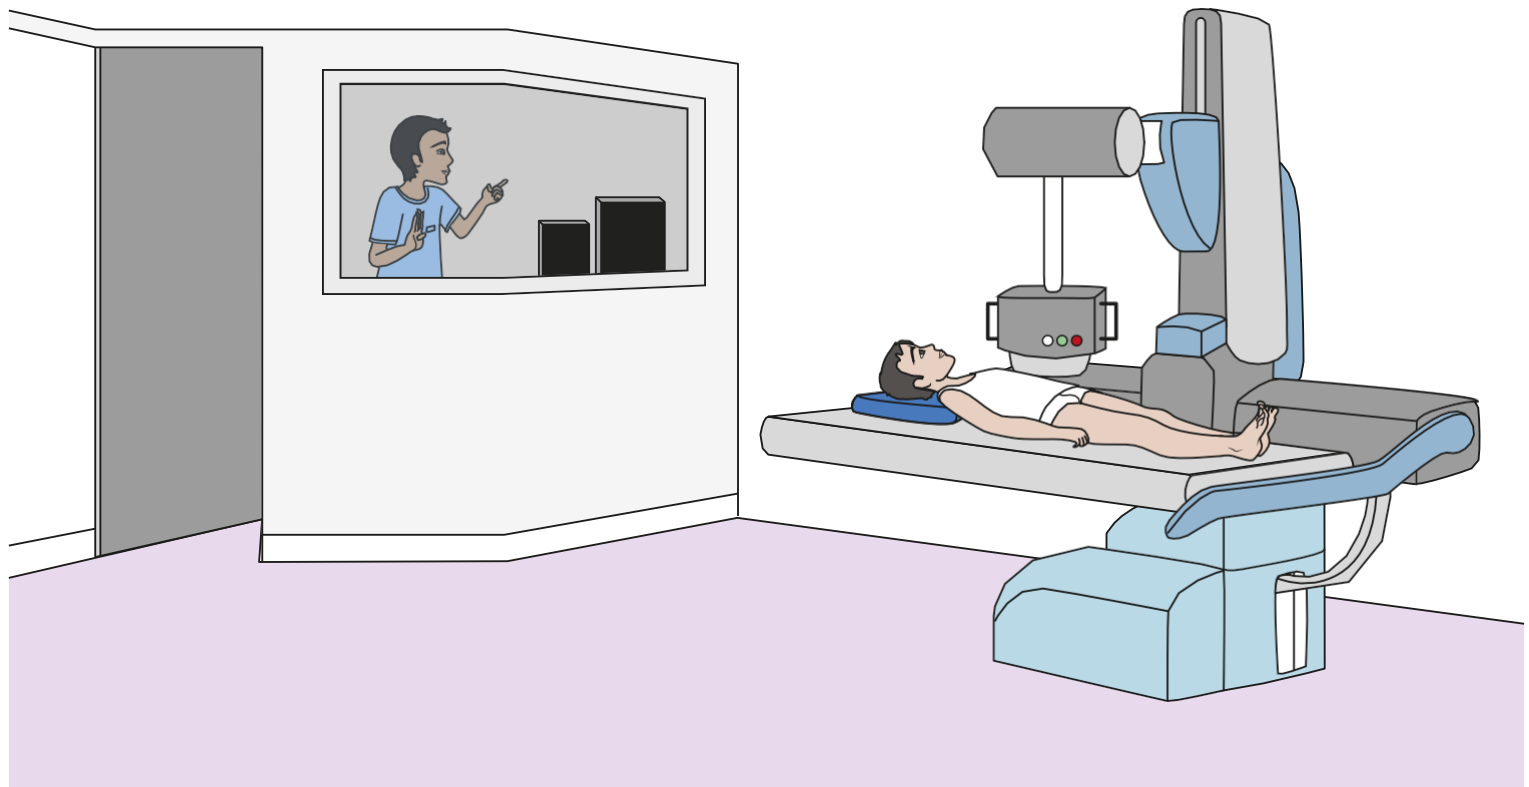

The radiographer positions the tube to take the X-Ray.

- I hear a noise when the tube moves.

The machine never touches my body.

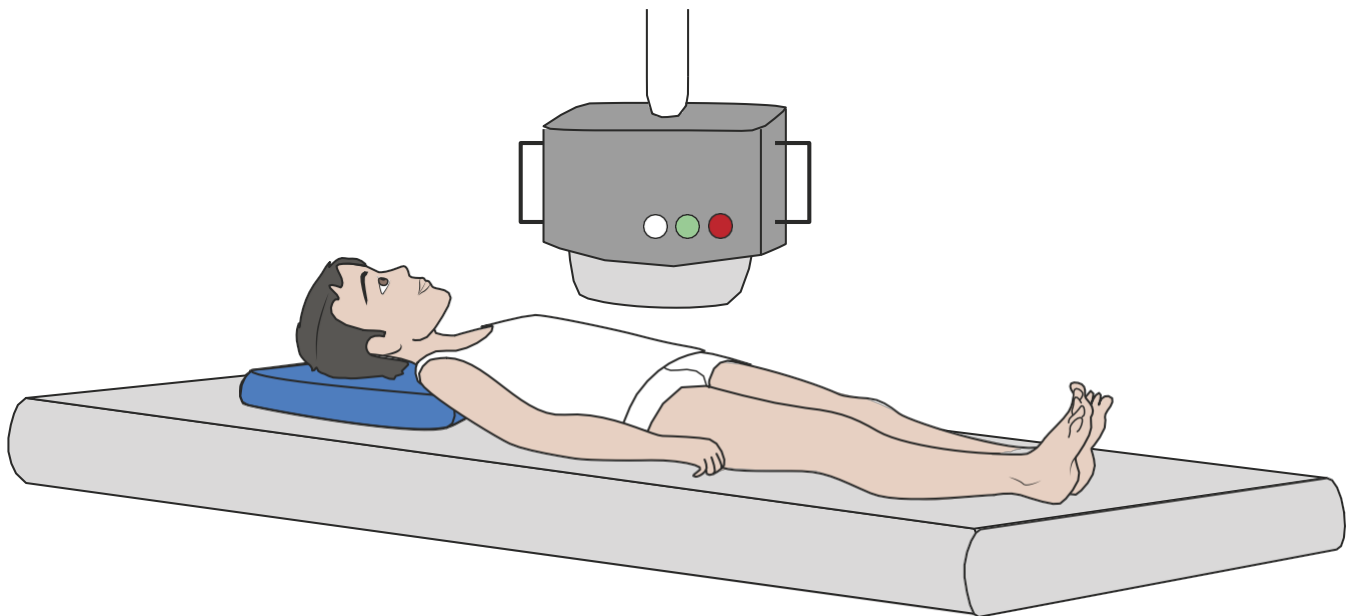

The radiographer goes into the booth

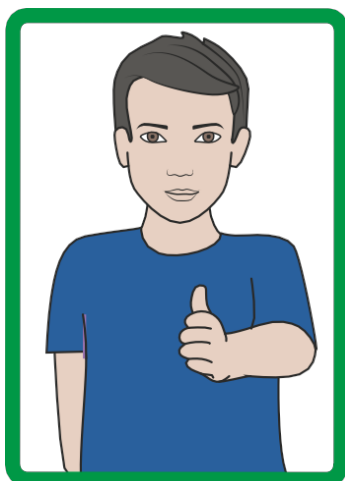

- The radiographer tells me not to move.

The machine takes the X-Ray.

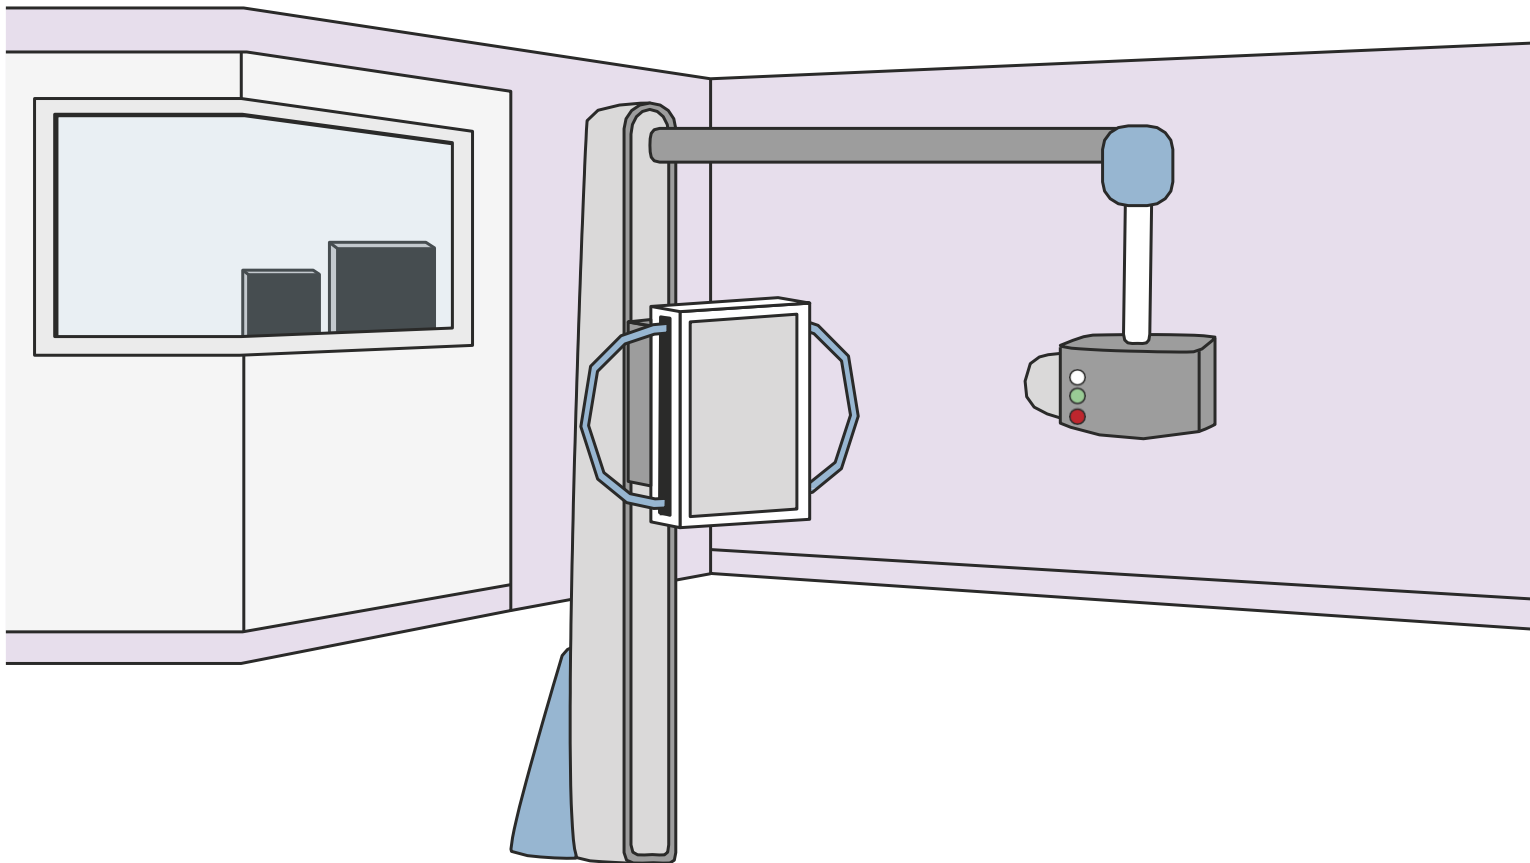

- It doesn't hurt.

- It's very quick.

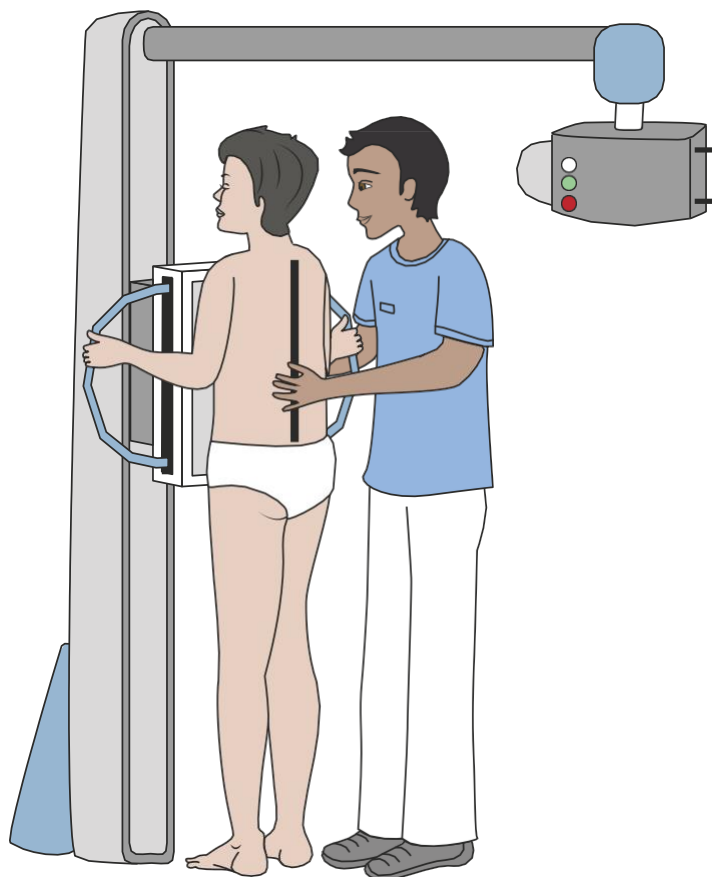

To take an X-Ray of my lungs, the machine is different.

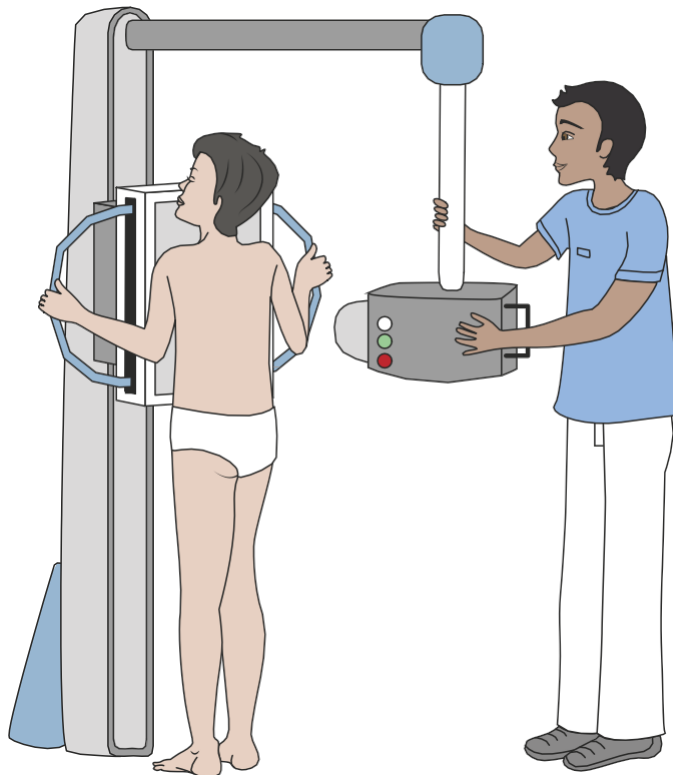

The radiographer puts me in front of the machine.

- They may ask me to undress my top half.

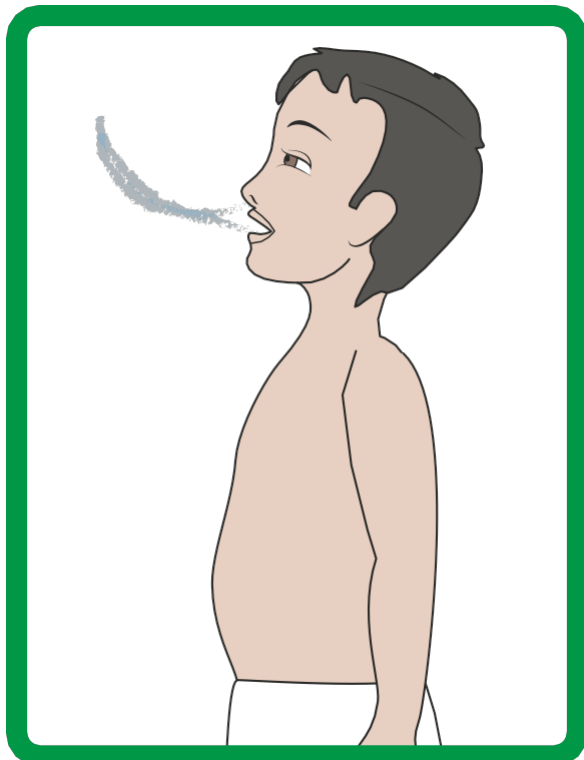

**They position the tube.**

It makes a noise.

● **They tell me to take a deep breath.**

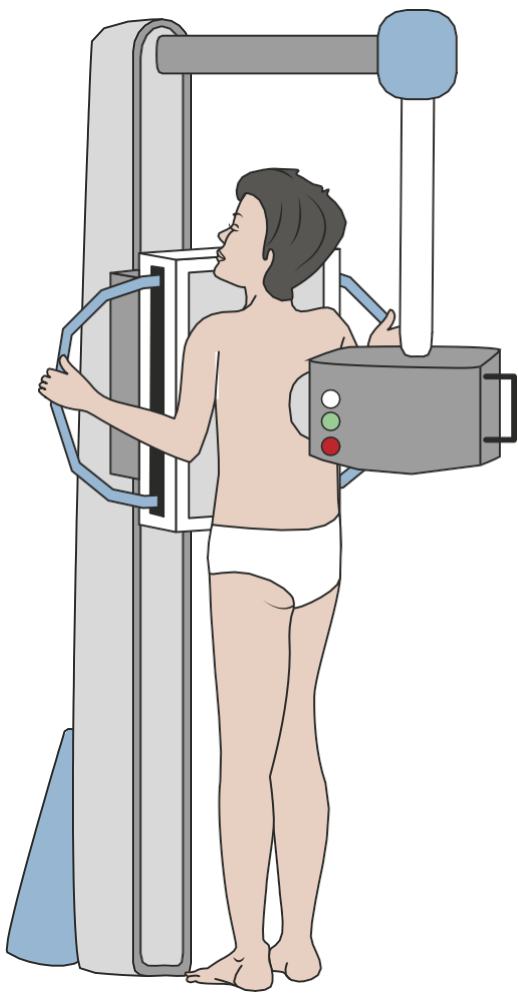

I must keep the air in my lungs  
for a few seconds.

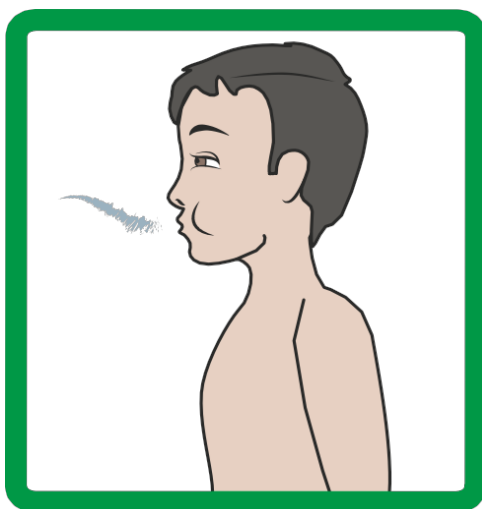

- The machine takes an X-Ray.

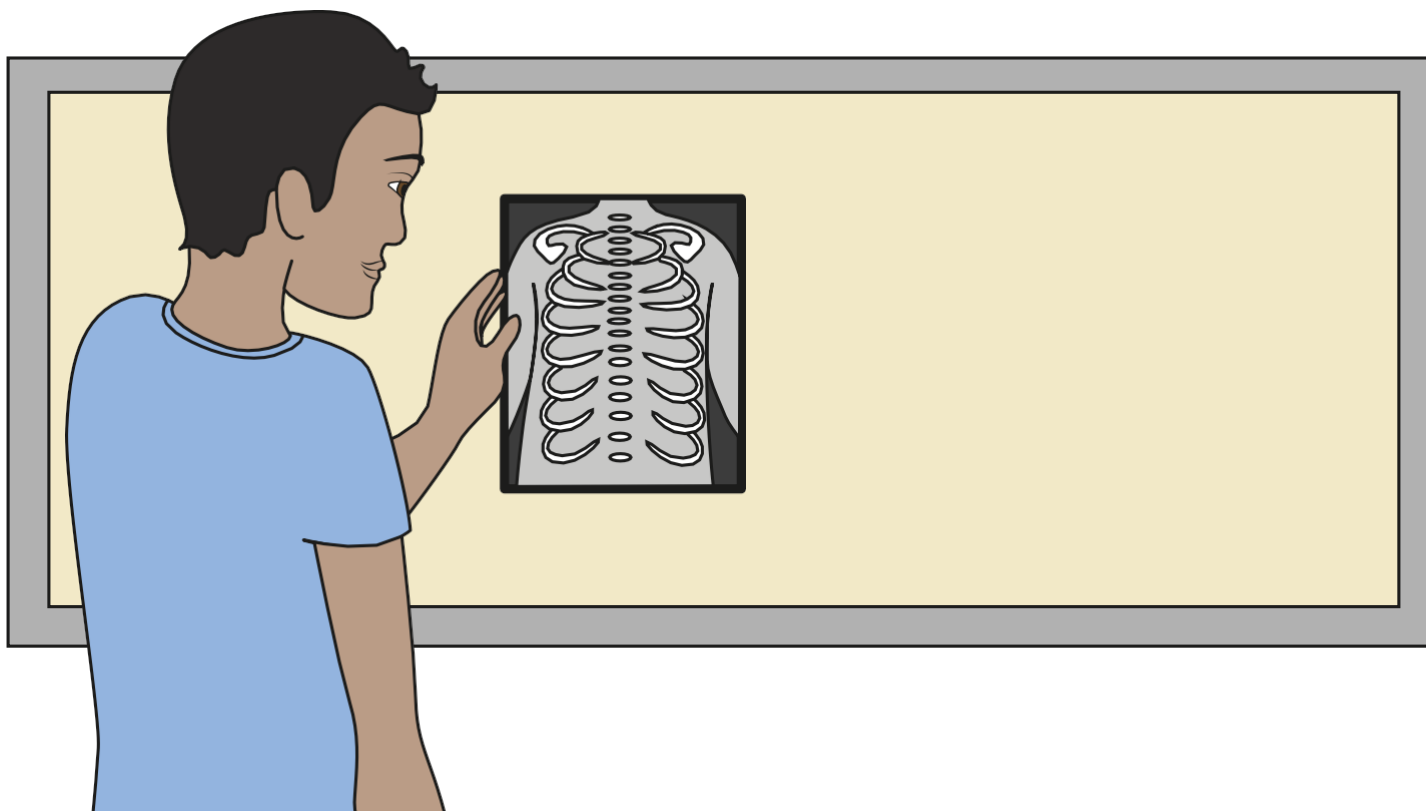

It's very quick.

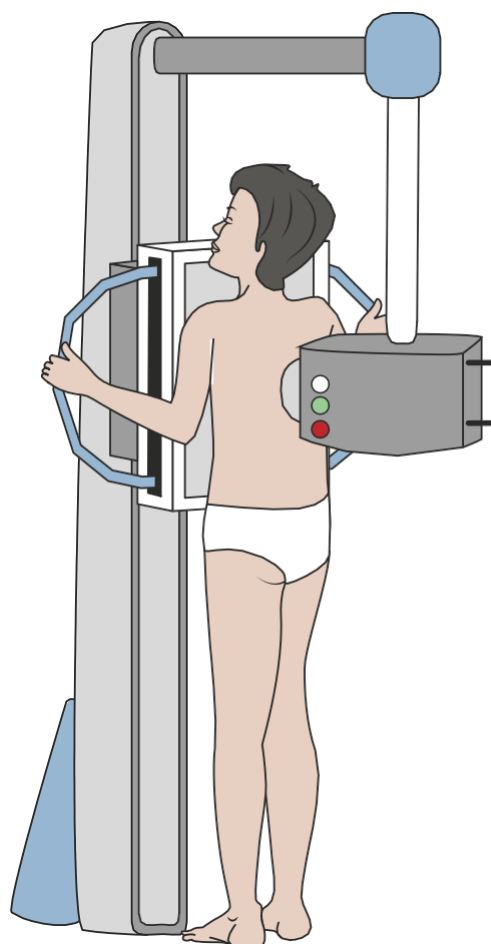

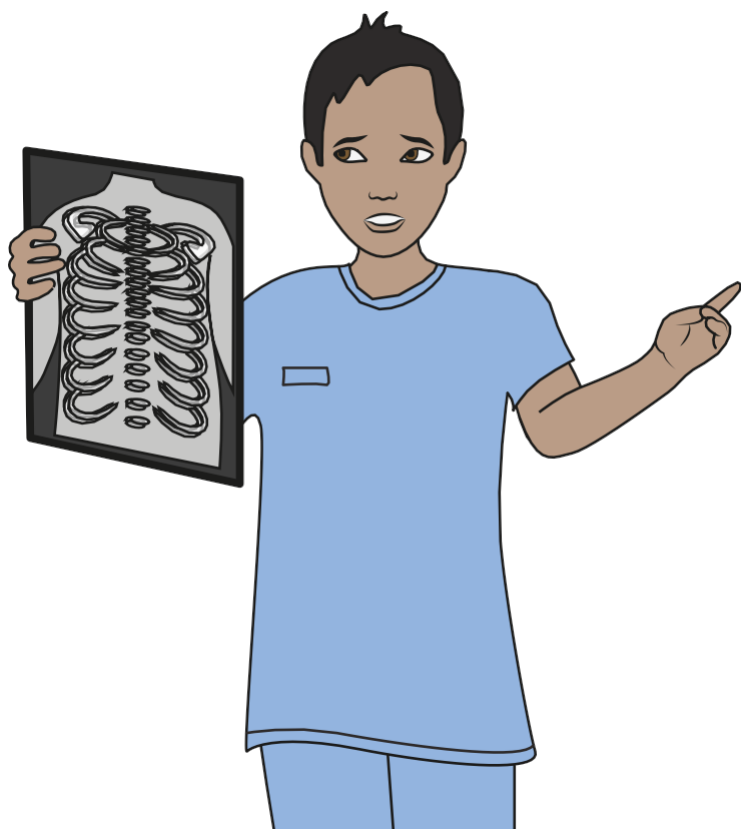

- The X-Ray is finished. I can breathe again.

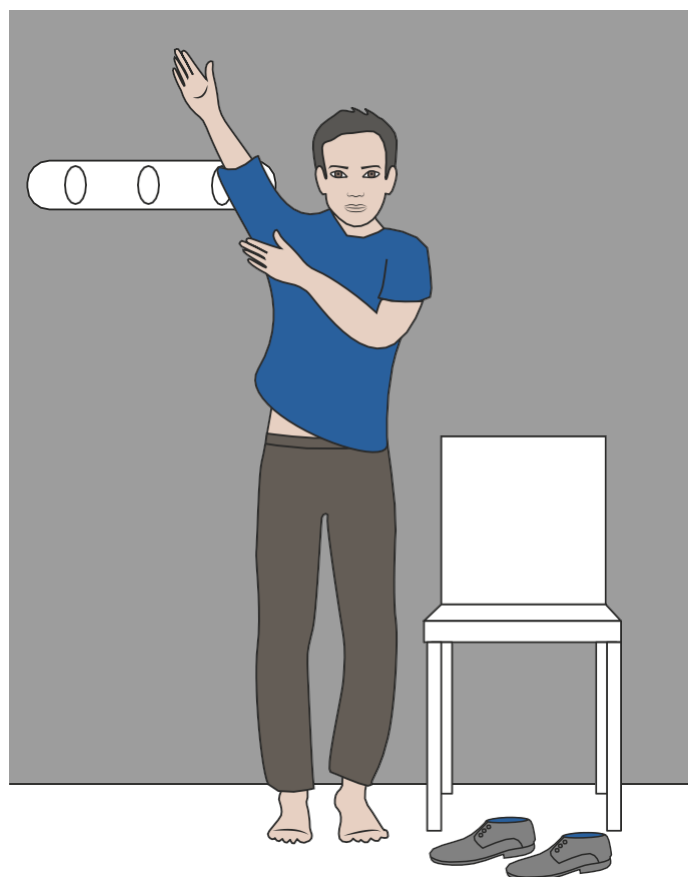

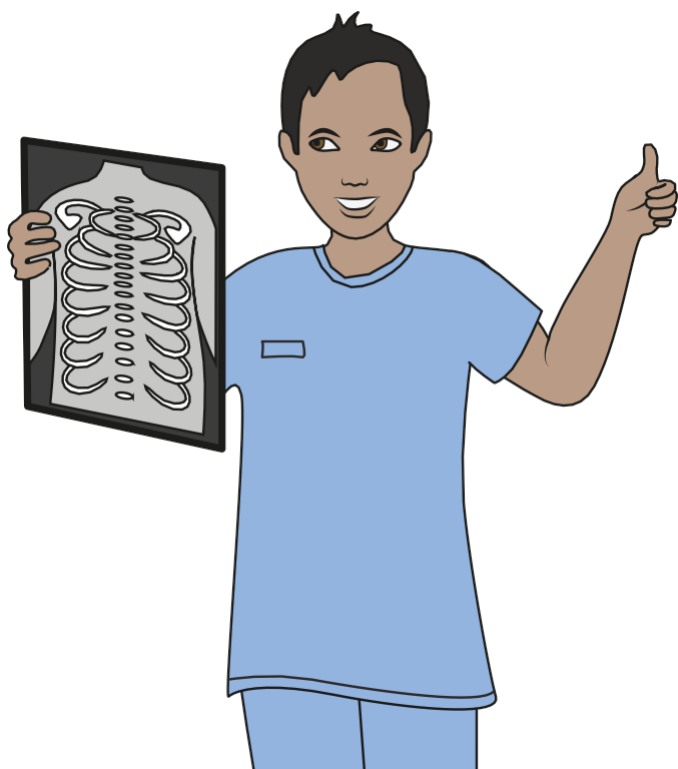

**The radiographer checks the X-Ray.**

● **The radiographer may want to take another X-Ray.**

- After the X-Ray I can put my clothes on.

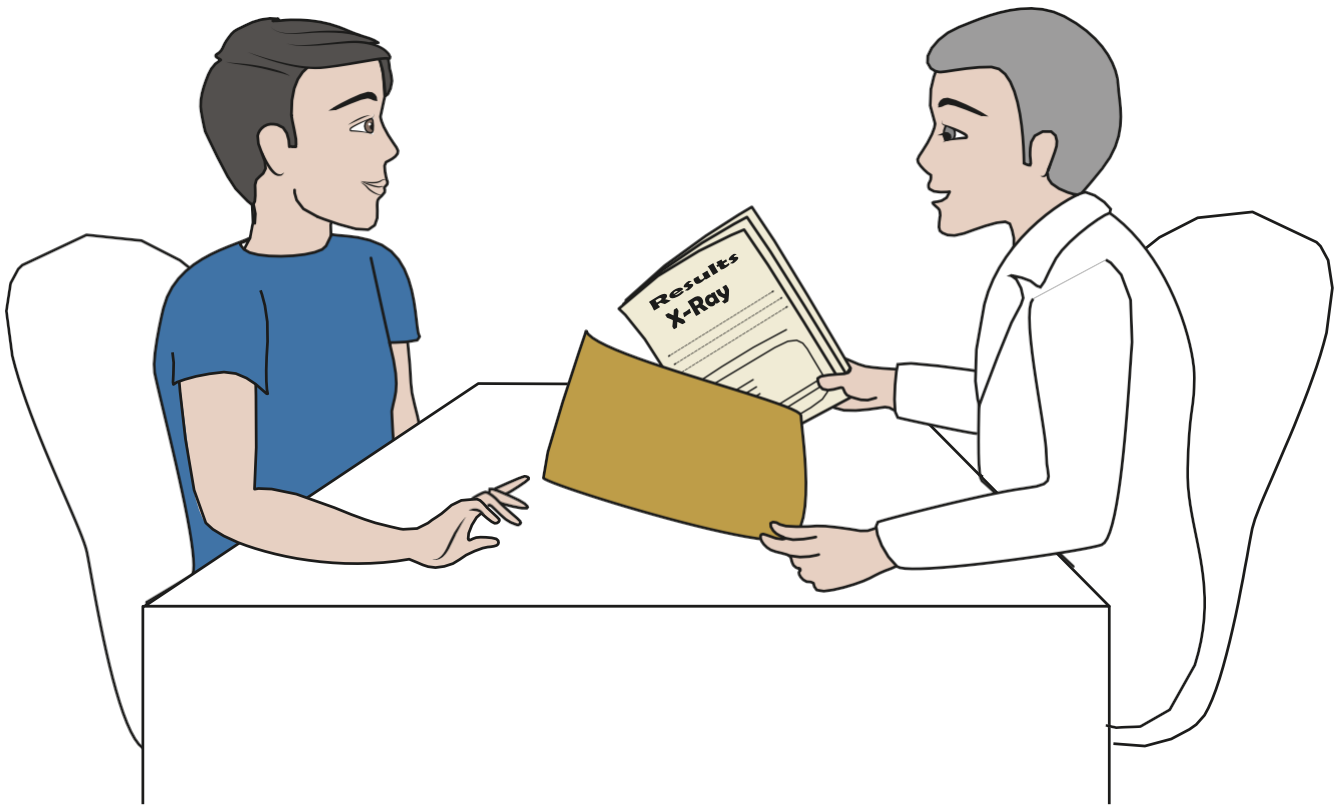

### **The radiologist writes a report.**

The radiologist is the doctor who analyses the images from the X-Ray.

- The receptionist or the radiographer tell me how to get my results.
