The Dentist

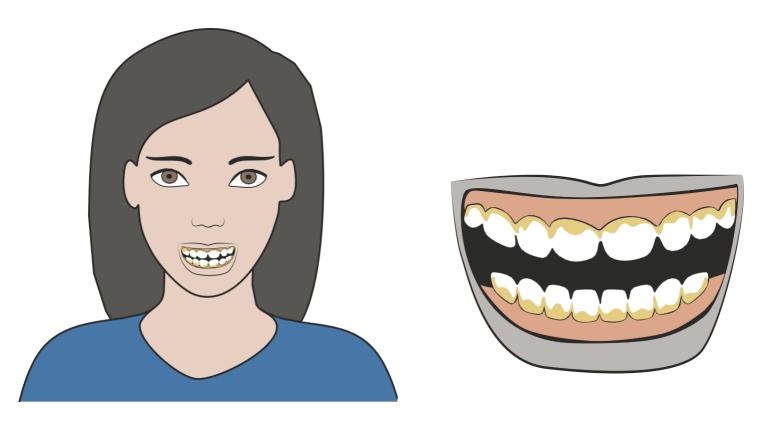

Tartar Removal

What is tartar?

Tartar is a hard, sandy coloured substance on my teeth.

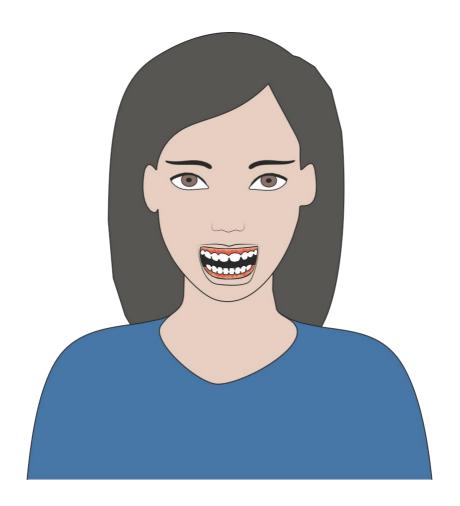

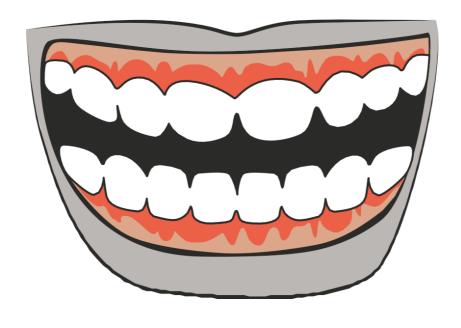

It is important to remove tartar to stop:

Bad smells,

Gum disease

The dentist removes the tartar

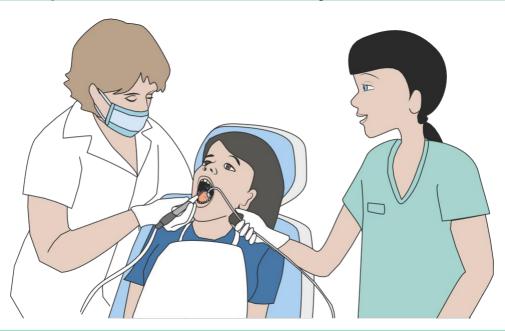

The dentist uses a small tool to scrape the tartar from my teeth.

The tool vibrates, makes a noise and sprays water

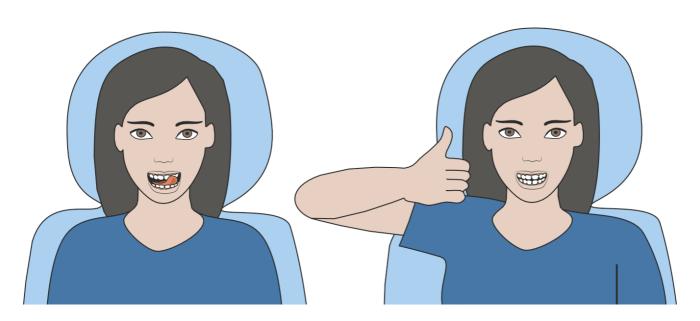

The dental nurse puts a small suction tube in my mouth.

The dentist polishes my teeth with another small tool.

Afterwards, my teeth are clean and shiny.

This factsheet was produced in partnership with

The French Union for Oral and Dental Care (UFSBD) and the SOSS network which promotes access to oral and dental care for people with disabilities.

It was created with financial support from our partners:

The translation of this tool was made possible thanks to the support of the Orange Foundation.

Where can I find SantéBD booklets?

On the internet:

Visit the website: http://www.santebd.org

On my tablet or smartphone:

Download the SantéBD app from:

All SantéBD booklets are free.

SantéBD is a project by the NGO CoActis Santé. contact@coactis-sante.fr

SantéBD booklets are produced in partnership with different participants from the world of healthcare and working with disabilities. Illustrations by Frédérique Mercier.
