# Vaccination against Covid-19
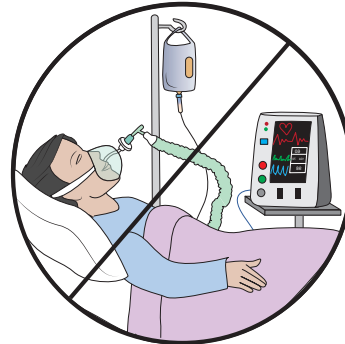

The vaccine protects me against Covid-19.

If I have the vaccine:
If I get Covid-19, I will be less sick.
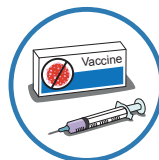

## The vaccine is for everyone.
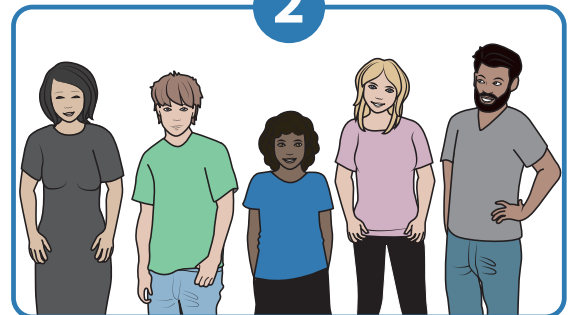

Some people are vaccinated before anyone else.

1

Soon, everyone will have the vaccine.

2

**People visiting from other countries can get the vaccine.**

You don't need to be a French citizen to get the vaccine

They will let me know when it is my turn.
I make an appointment to get the vaccine.

The vaccine against Covid-19 isn't obligatory.

The doctor will tell me if I can have the vaccine.

I must say if I want to have the vaccine or not.
It's my choice!

To help me decide, I can talk to:

my doctor,

my friends,
my family,

my guardian,

someone who works
for the Red Cross.

The vaccine is given by a healthcare worker.

They give me an injection in my arm.

The injection hurts a little,
but it doesn't last long.

After the vaccine.

For 1 or 2 days, I might have:

| some redness where I had the injection,	a headache,	a slight temperature,	soreness in my muscles.

## To help me feel better:
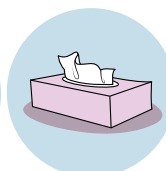

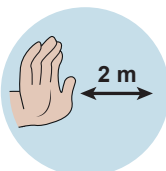

I rest,

I drink plenty of water.
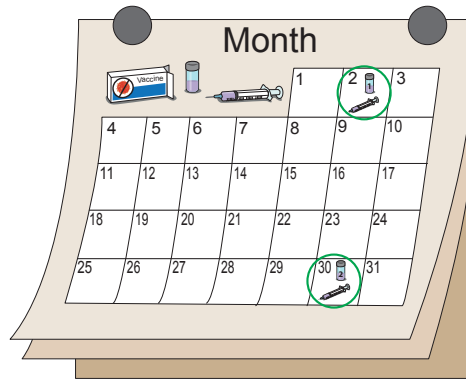

If I feel very unwell, I call my doctor.
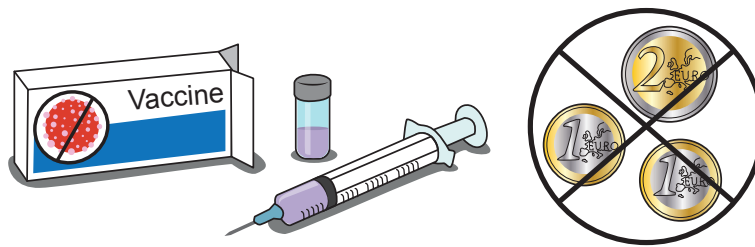

After the vaccine, I continue to social distance.
Everyone continues to social distance.

2 m

For extra protection, I get another vaccine 4 weeks later.

Month

Vaccine

The vaccine is free.

Vaccine

To make an appointment for the vaccine:

I can call 0800 009 110

or visit the website www.sante.fr
